Questions and Government Responses - 1 page

**DESIGN FOR LANDSCAPE ARCHITECTURAL IMPROVEMENTS FOR THE  
SUPREME COURT OF THE UNITED STATES, WASHINGTON, D.C.**

Questions and Government Responses

1. Question: Para 5.11 and 5.12 - what is the scope for the design of "new pathways for electrical service" and "provisions for future ductbanks"? It would be helpful to know what the extent of the design work will be. Which side(s) of the building? From where to where?

Response: The only pathways for electrical service that you should be concerned about are the ones that you will be designing for any modifications to existing grounds lighting or their design for new grounds lighting.

2. Question: Para 6.1.8 - clarify the scope that requires "the design shall include a 6" x 3" security ductbank." Confirm the number of ducts and diameter required. Will they be concrete encased? Should they terminate in manholes/handholes or in the building or where?

Response: Please disregard any reference to "security ductbanks".
